[cal.com/milind](https://cal.com/milind)

Full-stack software engineer specializing in React, Next.js, and scalable product engineering. Experienced in building AI-integrated SaaS platforms serving millions of users with solid foundations in system design, component architecture, and performance optimization. Contributor to open-source at Vercel and frequent speaker at React community meetups.

## EXPERIENCE

**Product Engineer** February 2025 — Present

*Merlin AI by Foyer*

Driving product engineering initiatives for Merlin AI, focused on seamless AI integration and next-gen chat experiences.

- Shipped ChatGPT Imports UI, enabling 10,000+ users to migrate chat history smoothly.
- Launched project-based chat history pages, improving user navigation and increasing session retention by 15%.
- Revamped the Model Selector, boosting model adoption by 80% and improving user satisfaction scores by 30%.
- Led development of a prompt enhancement feature, improving real-time UX for 2M+ users by bridging backend streaming with a responsive frontend.

**Software Engineer** December 2024 — February 2025

*SARAL - The Influencer OS*

Built core features and internal tools improving efficiency and decision-making for influencer campaigns.

- Delivered revamped dashboard—reduced onboarding and insight delivery time by 30%.
- Engineered a multi-select drag-and-drop feature for campaign management, increasing ops efficiency by 40% for large-scale campaigns.
- Built a content submission system to streamline influencer-brand collaboration, reducing content approval times by 60%.
- Enhanced real-time campaign metric tracking, empowering managers with data to improve campaign ROI by up to 20%.

## OPEN SOURCE CONTRIBUTIONS

**Vercel** vercel/streamdown

feat: add table markdown copy and csv/markdown download options #99

feat: add download functionality to code blocks #102

feat: add image download functionality with hover controls #103

## PROJECTS

**AI Roadmap Generator** Present

[airoadmapgenerator.com](http://airoadmapgenerator.com)

Web app generating personalized and visual learning roadmaps powered by Next.js, React, Canvas, and LLMs. Used by thousands of learners and engineers to break down any tech domain.

- Generated over 250 roadmaps and reached 5,600+ unique visitors within months of launch.
- Features real-time topic-to-roadmap generation with highly interactive visualizations, empowering rapid self-learning.
- Recognized as a successful project launch on Peerslist; highlighted for exceptional product execution.
- Includes privacy-friendly, shareable roadmaps and book recommendations, all built with scalable, privacy-first engineering.
- Led frontend, LLM integration, and roadmap visualization; orchestrated team-wide product improvements.

**Sideprojects Directory** Present

[sideprojects.directory](http://sideprojects.directory)

Platform surfacing and auto-profiling open-source side projects from GitHub, growing project visibility and developer collaboration.

- Indexed dozens of unique side projects, driving organic discovery and supporting project-based hiring.
- Enabled GitHub-based auto-profile import, reducing project onboarding to seconds.
- Facilitated connections between early-stage engineers, makers, and hiring managers.
- Improved open-source visibility, with multiple projects receiving new contributors through directory exposure.

## EDUCATION

**National Yang Ming Chiao Tung University** February 2023 — July 2023

*Short Term Research Program, Computer Software Engineering*

**Visvesvaraya Technological University** August 2018 — January 2022

*Bachelor of Engineering, Electronics and Communication*

## CERTIFICATES

TALKS

Building Real-Time Applications with Reactive Databases

May 2025

React Play x React Bangalore Meetup  
Real-time applications with React and Convex.

AI for React Developers

April 2025

React Bangalore Meetup  
A deep-dive into Vercel's AI SDK.
